L'OPERAZIONE

Fincons e spin-off PoliBa lanciano Scotty Expert: nasce l'industria 4.0

A. Ceo Michele Moretti

A. Ceo Tommaso Di Noia

Firenze Group, società internazionale di IT business consulting e sistemi integrati con oltre 2000 dipendenti in EMEA e negli USA, annuncia la partnership con Wiberose, la società spin-off del Politecnico di Bari specializzata in soluzioni tecnologiche di AI/VR, AI e Recommendation Systems e nella realizzazione di prodotti per l'industria 4.0. Insieme, le aziende si presentano al mercato con una soluzione innovativa denominata "Scotty Expert" che offre il miglior know-how e le più avanzate competenze nell'ecosistema manifatturiero. Un software rivoluzionario che permette il collegamento degli operatori onsite con esperti da remoto, migliorando le prestazioni grazie alla realtà aumentata, con annotazioni video in real time e allegamenti di dati contextuali. Il software è completamente compatibile con tutti i dispositivi industriali e mobili e consente gli utenti finali con le migliori e innovative esperienze AR, ai gradini dell'industria tutti i requisiti di settore.

Un software rivoluzionario permette il collegamento degli operatori onsite con tecnici da remoto

Scotty Expert garantisce l'accesso alla remote knowledge, riduce il tempo di fermo macchina e riduce i costi di trasporto. Può essere implementato in diverse applicazioni, a partire dalla formazione dei team di lavoro con modelli 3D ed esperienze multimediali che consentono il primo coinvolgimento degli operatori nel processo di coaching. Due altre attività di

manutenzione (con la possibilità di realizzare operazioni remote) casate grazie ad ambienti 3D condivisi, compresi i proof of concept virtuali in scenari comuni. "Fincons conferma il suo impegno nell'innovazione offrendo alle aziende soluzioni ad alto valore aggiunto e supportando il loro percorso di trasformazione digitale", spiega Michele Moretti, Ceo di Fincons

Group. "La partnership con Wiberose rappresenta una grande opportunità. È un esempio concreto di proficua collaborazione con un'azienda innovativa che unisce conoscenze accademiche, soluzioni e risultati provenienti dai laboratori di ricerca". "Vediamo Fincons Group come un partner prezioso", aggiunge Tommaso Di Noia, chief rnk officer di Wiberose. "La loro profonda conoscenza del settore manifatturiero, l'impegno e il coinvolgimento in importanti progetti con aziende tier-one saranno il trampolino di lancio per il successo di Scotty Expert nell'industria 4.0, che permetterà di migliorare processi industriali e rivoluzionare l'approccio alle attività operative principali". Fincons Group è una società di IT business consulting e system integration che in 30 anni di storia si è affermata con successo sul mercato nazionale ed internazionale grazie alla propria esperienza e profonda conoscenza del mercato core business di diversi settori. - red.lev.

Il sindacato. Vertenza Leonardo, accordo sul piano di investimenti da oltre 300 mln

La direzione aziendale di Leonardo spa e le organizzazioni sindacali del territorio di Pinerolo e il loro hanno ratificato nel corso di un incontro medio il stabilimento di Grottole. L'accordo quadro del 28 gennaio scorso per la messa in sicurezza e per il rilancio della Divisione Aerospazio di Leonardo One Company, che comprende diversi siti. Lo rende noto il segretario nazionale della Fim Cisl, Roberto Donatelli, spiegando che l'azienda è finalizzata al rilancio della Divisione Aerospazio,

A. Il segretario Roberto Donatelli

attorno a un piano di investimenti da oltre 300 milioni che si svilupperà nell'arco degli anni 2022-2025. Nel corso dell'incontro è stata espressa la richiesta aziendale di intervento della Cassa di integrazione agevolata ordinaria (Ciga), a zero ore, per 12 settimane a far data dal 1° gennaio 2022. Per lo stabilimento a zona di competenza di Grottole, dove si realizzano le fusole del Boeing 787, la procedura riguarda un numero massimo di 1.049 lavoratori.

La polemica

Arpal, 200 prorogati ma è bufera su Cassano che non si presenta

È stato occasionale annunciare una svolta a sorpresa da parte di tutti i consiglieri regionali convocati negli uffici dell'Arpal. L'agenzia regionale per il lavoro, per cominciare i vertici regionali e, di conseguenza, il direttore generale dell'agenzia Massimo Cassano a sbocciare la proroga dei contratti dei 200 lavoratori somministrati all'intero dei centri per l'impiego. Si è concluso così uno scudo istruttivo che va avanti da settimane e che oppone lo stesso Cassano a diversi consiglieri regionali di maggioranza, compreso l'assessore regionale al Lavoro Sebastiano Leo, che almeno fino ad ora fa parte ancora del Popolare, soggetto politico costituito proprio da Cassano.

presidente Donato Metallo, per spiegare i motivi per cui non aveva ancora prorogato i termini dei 200 lavoratori somministrati. Il dg Cassano non si è presentato all'appuntamento in diretta streaming. Decisione che ha scatenato l'ira dei presenti: "Gravissima carenza di sensibilità istituzionale" ha bollato il dem Michele Matarazzo che ha sollecitato la proroga sulla base di un articolo di legge di bilancio approvata a dicembre scorso. Anche perché - hanno fatto notare di-

A. Dg Massimo Cassano

versi consiglieri - con questo proroghe si possono riaffermare i centri per l'impiego a costo di prorogare fino a giugno, mese in cui saranno ormai a pieno regime le procedure di assunzione dei vincitori dell'ultimo concorso Arpal. Nella stessa linea anche l'assessore Leo. Al termine della seduta, un preavviso telefonico tra commissione e vertice di presidenza ha sbocciato la situazione sui contratti che saranno rinnovati da oggi: "Ritorno al responsabile della Trasparenza su Roberto Versari - ha commentato il presidente di commissione, Metallo - che si è messo a disposizione". Ma per i consiglieri di Fratelli d'Italia, "Cassano deve avere il coraggio di venire che i componenti della commissione si presentino nell'agenzia". - *Aut.ass.*

L'allarme

Ex Osram, in 150 rischiano il posto

Rischiano di perdere il lavoro i 150 operai della Baritech, ex Osram, azienda nella zona industriale che ha prodotto lampadine e che nell'ultimo anno si è specializzata nel tessuto della mascherine anti Covid. A lanciare l'allarme è la Cgil di Bari, i cui rappresentanti hanno incontrato il presidente delle testé forze sul lavoro della regione Puglia, Leo Cavali. "Devono intervenire responsabilmente istituzioni e politici, ma sono anche e soprattutto le imprese che vanno richiamate a una responsabilità sociale che stiano dimostrando di non avere", dice la segretaria generale della Cgil di Bari, Gigliucci.

FINCONS GROUP

L'azienda annuncia la recente **PARTNERSHIP CON WIDEVERSE** per la piattaforma Scotty Expert

Michele Moretti, CEO di Fincons Group

Tommaso Di Noia, CRO di Wiverse

Fincons Group, società internazionale di IT business consulting e system integration con oltre 2.000 dipendenti in EMEA e negli USA, annuncia la partnership con Wiverse, la società spin-off del Politecnico di Bari specializzata in soluzioni tecnologiche di AV/VR, AI e Recommender Systems e nella realizzazione di prodotti per l'industria 4.0. Insieme, le aziende si presentano al mercato con una soluzione innovativa denominata Scotty Expert che offre il miglior know-how e le più avanzate competenze nell'industria manifatturiera. Un software rivoluzionario che permette il collegamento degli operatori onsite con esperti da remoto, migliorando le prestazioni grazie a realtà aumentata, comunicazioni video in real-time e ologrammi di dati contestuali. Il software è completamente compatibile con tutti i dispositivi indossabili e mobili e coinvolge gli utenti finali con le migliori e innovative esperienze AR, in grado di soddisfare tutti i requisiti di settore.

Scotty Expert garantisce l'accesso alla remote knowledge, minimizza i tempi di fermo macchina e riduce i costi di trasferta. Può essere implementata in diversi campi di applicazione, a partire dalla formazione dei team di lavoro con modelli 3D ed esperienze multimediali che consentono il pieno coinvolgimento degli operatori nel processo di coaching, fino alle attività di manutenzione con la possibilità di condurre operazioni remote-onsite grazie ad ambienti 3D condivisi, compresi i proof of concept studiati su scenari comuni. «Fincons conferma il suo impegno nell'innovazione offrendo alle aziende soluzioni ad alto valore aggiunto e supportando il loro percorso di trasformazione digitale», spiega Michele Moretti, CEO di Fincons Group. «La partnership con Wiverse rappresenta una grande opportunità: è un esempio concreto di proficua collaborazione con un'azienda innovativa che unisce conoscenze accademiche, soluzioni e risultati provenienti dai laboratori di ricerca».

PRESS RELEASES

Fincons Group announces latest partnership with Wideverse for Scotty Expert platform

Fincons Group partners with Wideverse, to launch the Scotty Expert platform, connecting frontline workers with remote experts.

Milan, 2 February 2022 – Fincons Group, an international IT business consulting and system integration company with over 2000 employees in EMEA and in the USA, announces the latest partnership with Wideverse, the academic spin-off company of Polytechnic University of Bari specialized in delivering AV/VR, AI and Recommender Systems tech solutions and devising products for industry 4.0, for the launch of “Scotty Expert”, a platform developed thanks to a long-standing expertise in Artificial Intelligence, Augmented and Virtual Reality, Machine Learning for Recommender Systems.

Together, the companies will provide the market with a brand-new solution offering the best know-how and skills in manufacturing industry. This cooperation further bolsters Fincons’ client offering with an innovative software for connecting frontline workers with remote experts, enhancing operators’ on-site performances with AR technology, real-time video communications, and contextual data holograms. The software is fully compatible with all wearable and mobile devices and brings end users the best, most immersive, and innovative AR experiences responding to all industry requirements.

Scotty Expert guarantees access to remote knowledge, minimizes machine downtime and reduces transfer costs. It can be implemented in several fields of applications, starting from workforce training with 3D models and multimedia experiences enabling the worker to be fully involved in the coaching process, through to maintenance activities with the opportunity to lead long-distance operations between experts and on-site workers via shared 3D environments including even the proof of concepts based on common scenarios.

“Fincons thus confirms its commitment to innovate while delivering clients value and standing by them throughout their digital transformation journey,” explains Michele Moretti, CEO of Fincons Group, “It is a great opportunity to partner with Wideverse. This is a concrete example of a fruitful collaboration with an innovative company that combines academic knowledge, solutions, and results coming from research labs.”

“We see Fincons Group as a valuable partner,” adds Tommaso Di Noia, CRO of Wideverse, “their deep understanding of manufacturing sector and the commitment and involvement in huge projects with tier-one companies will act as a springboard for the success of Scotty Expert in industry 4.0, introducing sustainable processes and revolutionizing the approach to core operation activities.”

About Fincons Group

Fincons Group is an award-winning IT business consultancy with 39 years of experience in IT Business Consulting and System Integration active in different industries including Financial Services, Media, Energy & Utilities, Transportation, Manufacturing, Public Administration and International Institutions & Research. High quality, scalability and competitiveness are guaranteed by the Smart-shore IT Service strategy made available through the Delivery Center in Bari and 7 national hubs. Innovation is a mindset for Fincons, which constantly invests in Research & Development and collaborates with international Universities and Research Centers, ranging from technology scouting to solution engineering, co-investing with pioneering customers. With over 2000 employees, Fincons Group has offices in Italy, Switzerland, Germany, France, UK and US.

About Wideverse

Wideverse is a start-up, spin-off of the Polytechnic of Bari, born in October 2016, which develops products and solutions based on Augmented Reality (AR), Virtual Reality (VR), Mixed Reality (MR), and Artificial Intelligence (AI) technologies. Developed around the notion of Metaverse, Wideverse vision is to create new tools capable of enriching our daily experience in designing and using information and improving operational processes through better information management and technology-mediated physical interaction. Wideverse mission is to make everyday activities more engaging through VR/AR/MR and AI technologies. To achieve this goal, Wideverse develops products and software solutions also based on IoT and wearable devices. The flagship product of Wideverse is Scotty.Expert, a Mixed Reality platform that allows the user to provide remote support to operators in the field, create and manage operational field procedures, adopt an innovative approach to on-the-job training. All this, supported by artificial intelligence technologies and solutions.

Fincons Group announces latest partnership with Wideverse for Scotty Expert platform

by HR Today
14 days ago

Fincons Group partners with Wideverse, to launch the Scotty Expert platform, connecting frontline workers with remote experts.

Milan, 2nd February 2022 – Fincons Group, an international IT business consulting and system integration company with over 2000 employees in EMEA and in the USA, announces the latest partnership with Wideverse, the academic spin-off company of Polytechnic University of Bari specialized in delivering AV/VR, AI and Recommender Systems tech solutions and devising products for industry 4.0, for the launch of "Scotty Expert", a platform developed thanks to a long-standing expertise in Artificial Intelligence, Augmented and Virtual Reality, Machine Learning for Recommender Systems.

Tommaso Di Noia, Wideverse

Together, the companies will provide the market with a brand new solution offering the best know-how and skills in manufacturing industry. This cooperation further bolsters Fincons' client offering with an innovative software for connecting frontline workers with remote experts, enhancing operators' on-site performances with AR technology, real-time video communications, and contextual data holograms. The software is fully compatible with all wearable and mobile devices and brings end users the best, most immersive, and innovative AR experiences responding to all industry requirements.

Scotty Expert guarantees access to remote knowledge, minimizes machine downtime and reduces transfer costs. It can be implemented in several fields of applications, starting from workforce training with 3D models and multimedia experiences enabling the worker to be fully involved in the coaching process, through to maintenance activities with the opportunity to lead long-distance operations between experts and on-site workers via shared 3D environments including even the proof of concepts based on common scenarios.

"Fincons thus confirms its commitment to innovate while delivering clients value and standing by them throughout their digital transformation journey," explains Michele Moretti, CEO of Fincons Group, "It is a great opportunity to partner with Wideverse. This is a concrete example of a fruitful collaboration with an innovative company that combines academic knowledge, solutions, and results coming from research labs."

"We see Fincons Group as a valuable partner," adds Tommaso Di Noia, CRO of Wideverse, "their deep understanding of manufacturing sector and the commitment and involvement in huge projects with tier-one companies will act as a springboard for the success of Scotty Expert in industry 4.0, introducing sustainable processes and revolutionizing the approach to core operation activities."

About Fincons Group
Fincons Group is an award-winning IT business consultancy with 39 years of experience in IT Business Consulting and System Integration active in different industries including Financial Services, Media, Energy & Utilities, Transportation, Manufacturing, Public Administration and International Institutions & Research. High quality, scalability and competitiveness are guaranteed by the Smart-shore IT Service strategy made available through the Delivery Center in Bari and 7 national hubs. Fincons Group Announces Latest Partnership With Wideverse for Scotty Expert Platform

by ITech News Desk · February 2, 2022

SHARE 0   

Fincons Group partners with Wideverse, to launch the Scotty Expert platform, connecting frontline workers with remote experts.

Fincons Group, an international IT business consulting and system integration company with over 2000 employees in EMEA and in the USA, announces the latest partnership with Wideverse, the academic spin-off company of Polytechnic University of Bari specialized in delivering AV/VR, AI and Recommender Systems tech solutions and devising products for industry 4.0, for the launch of "Scotty Expert", a platform developed thanks to a long-standing expertise in Artificial Intelligence, Augmented and Virtual Reality, Machine Learning for Recommender Systems.

Together, the companies will provide the market with a brand-new solution offering the best know-how and skills in manufacturing industry. This cooperation further bolsters Fincons' client offering with an innovative software for connecting frontline workers with remote experts, enhancing operators' on-site performances with AR technology, real-time video communications, and contextual data holograms. The software is fully compatible with all wearable and mobile devices and brings end users the best, most immersive, and innovative AR experiences responding to all industry requirements.

Scotty Expert guarantees access to remote knowledge, minimizes machine downtime and reduces transfer costs. It can be implemented in several fields of applications, starting from workforce training with 3D models and multimedia experiences enabling the worker to be fully involved in the coaching process, through to maintenance activities with the opportunity to lead long-distance operations between experts and on-site workers via shared 3D environments including even the proof of concepts based on common scenarios.

"Fincons thus confirms its commitment to innovate while delivering clients value and standing by them throughout their digital transformation journey," explains Michele Moretti, CEO of Fincons Group, "It is a great opportunity to partner with Wideverse. This is a concrete example of a fruitful collaboration with an innovative company that combines academic knowledge, solutions, and results coming from research labs."

"We see Fincons Group as a valuable partner," adds Tommaso Di Noia, CRO of Wideverse, "their deep understanding of manufacturing sector and the commitment and involvement in huge projects with tier-one companies will act as a springboard for the success of Scotty Expert in industry 4.0, introducing sustainable processes and revolutionizing the approach to core operation activities."

Fincons Group is an award-winning IT business consultancy with 39 years of experience in IT Business Consulting and System Integration active in different industries including Financial Services, Media, Energy & Utilities, Transportation, Manufacturing, Public Administration and International Institutions & Research. High quality, scalability and competitiveness are guaranteed by the Smart-shore IT Service strategy made available through the Delivery Center in Bari and 7 national hubs. Fincons partners with Wideverse to launch platform connecting frontline workers with remote experts

Posted on February 2, 2022

Tommaso Di Noia of Wideverse

Milan, Italy, 2 February 2022 – **Fincons Group**, an international IT business consulting and system integration company with over 2000 employees in EMEA and in the USA, is partnering with **Wideverse**, the academic spin-off company of Italy's Polytechnic University of Bari.

The university specialises in delivering augmented and virtual reality (AV/VR), artificial intelligence (AI) and Recommender Systems tech solutions and devising products for industry 4.0, for the launch of "Scotty Expert". This is a platform developed through a long-standing expertise in Artificial Intelligence, Augmented and Virtual Reality, Machine Learning for Recommender Systems.

Together, the companies will provide the market with a brand-new solution offering the best know-how and skills in manufacturing industry. This cooperation further bolsters Fincons' client offering with an innovative software for connecting frontline workers with remote experts, enhancing operators' on-site performances with AR technology, real-time video communications, and contextual data holograms. The software is fully compatible with all wearable and mobile devices and brings end users the best, most immersive, and innovative AR experiences responding to all industry requirements.

Scotty Expert guarantees access to remote knowledge, minimises machine downtime and reduces transfer costs. It can be implemented in several fields of applications, starting from workforce training with 3D models and multimedia experiences enabling the worker to be fully involved in the coaching process, through to maintenance activities with the opportunity to lead long-distance operations between experts and on-site workers via shared 3D environments including even the proof of concepts based on common scenarios.

"Fincons thus confirms its commitment to innovate while delivering clients value and standing by them throughout their digital transformation journey," explains Michele Moretti, CEO of Fincons Group. "It is a great opportunity to partner with Wideverse. This is a concrete example of a fruitful collaboration with an innovative company that combines academic knowledge, solutions, and results coming from research labs."

"We see Fincons Group as a valuable partner," adds Tommaso Di Noia, CRO of Wideverse, "their deep understanding of manufacturing sector and the commitment and involvement in huge projects with tier-one companies will act as a springboard for the success of Scotty Expert in industry 4.0, introducing sustainable processes and revolutionising the approach to core operation activities."

Fincons Group kündigt neueste Partnerschaft mit Wideverse für die Scotty Expert Plattform an

Die Fincons Group geht eine Partnerschaft mit Wideverse ein, um die Plattform Scotty Expert auf den Markt zu bringen, welche die Mitarbeiter vor Ort mit Experten remote verbindet.

Mailand, 2. Februar 2022 - Fincons Group, ein internationales IT-Beratungs- und Systemintegrationsunternehmen mit mehr als 2000 Mitarbeitern in EMEA und den USA, gibt die neueste Partnerschaft mit Wideverse bekannt, einem akademischen Spin-off-Unternehmen der Polytechnischen Universität Bari, das sich auf die Bereitstellung von AV/VR-, KI- und Empfehlungssystem-Technologielösungen und die Entwicklung von Produkten für die Industrie 4.0 spezialisiert hat. Die Partnerschaft wird die Einführung von "Scotty Expert" auf den Markt unterstützen: Scotty Expert ist eine Plattform, die dank langjähriger Erfahrung von Wideverse in den Bereichen künstliche Intelligenz, Augmented und Virtual Reality, maschinelles Lernen und Empfehlungssysteme entwickelt wurde.

Gemeinsam werden die Unternehmen dem Markt eine brandneue Lösung präsentieren, die das beste Know-how und die besten Fähigkeiten in der Fertigungsindustrie bietet. Diese Kooperation stärkt das Angebot von Fincons mit einer innovativen Software, die Mitarbeiter vor Ort mit Experten remote verbindet und die Leistung vor Ort mit AR-Technologie, Echtzeit-Videokommunikation und kontextbezogenen Datenhologrammen verbessert. Die Software ist vollständig kompatibel mit allen tragbaren und mobilen Geräten und bietet den Endnutzern die besten, immersivsten und innovativsten AR-Erlebnisse, die allen Anforderungen der Branche gerecht werden.

Scotty Expert garantiert den Zugang zu Remote Knowledge, minimiert die Stillstandszeiten der Maschinen und reduziert die Übertragungskosten. Scotty Expert kann in verschiedenen Anwendungsbereichen eingesetzt werden, von der Schulung von Mitarbeitern mit 3D-Modellen und per Multimedia, die es den Mitarbeitern ermöglichen, vollständig in den Coaching-Prozess einbezogen zu werden, bis hin zu Wartungsaktivitäten mit der Möglichkeit, remote Operationen zwischen Experten und Mitarbeiter vor Ort über gemeinsame 3D-Umgebungen zu leiten, einschließlich der Erprobung von Konzepten auf der Grundlage gemeinsamer Szenarien.

"Fincons bekräftigt hiermit sein Engagement für Innovation, indem es ihre Kunden einen Mehrwert bietet und sie auf ihrem Weg der digitalen Transformation begleitet", erklärt Michele Moretti, CEO der Fincons Group. "Es ist eine großartige Gelegenheit, mit Wideverse zusammenzuarbeiten. Dies ist ein konkretes Beispiel für eine fruchtbare Zusammenarbeit mit einem innovativen Unternehmen, das akademisches Wissen, Lösungen und Ergebnisse aus den Forschungslabors miteinander verbindet."

"Wir sehen die Fincons Group als wertvollen Partner", fügt Tommaso Di Noia, CRO von Wideverse, hinzu, "Ihr tiefes Verständnis des Fertigungssektors und das Engagement und die Beteiligung an großen Projekten mit Tier-One-Unternehmen werden als Sprungbrett für den Erfolg von Scotty Expert in der Industrie 4.0 dienen, indem sie nachhaltige Prozesse einführen und den Ansatz für die Kernfähigkeiten revolutionieren."

Über Fincons Group
Die Fincons Group ist ein preisgekröntes IT-Beratungs- und Systemintegrationsunternehmen, das sich in seiner 39-jährigen Geschichte dank seiner Erfahrung und fundierten Kenntnisse der Kerngeschäftsprozesse verschiedener Märkte erfolgreich auf dem nationalen und internationalen Markt etabliert hat. Medien-, Energie- und Versorgungsunternehmen, Finanzdienstleister, Transportunternehmen, Unternehmen der Fertigungsbranche, internationale Forschungsinstitutionen sowie öffentliche Verwaltung gehören dem Kundenkreis an. Neben IT-Beratungs- und Systemintegrationsdiensten umfasst das Angebot der Gruppe auch die Entwicklung von Kerngeschäftsprozessen, proprietäre Lösungen, Anwendungsmanagement und IT-Services im Smart-Shore-Modell dank dem Delivery Center in Bari und den 7 Hubs in ganz Italien. Die Fincons Gruppe unterhält Niederlassungen in Italien, der Schweiz, Deutschland, Frankreich, dem Vereinigten Königreich und den USA mit insgesamt über 2000 Mitarbeitenden. www.finconsgroup.com

Über Wideverse
Wideverse ist ein Start-up und Spin-off des Polytechnikums Bari, das im Oktober 2016 gegründet wurde und Produkte und Lösungen auf der Grundlage von Augmented Reality (AR), Virtual Reality (VR), Mixed Reality (MR) und künstlicher Intelligenz (KI) entwickelt. Die Vision von Wideverse, die auf dem Konzept der Metaverse basiert, ist es, neue Tools zu entwickeln, die unsere täglichen Erfahrungen bei der Gestaltung und Nutzung von Informationen bereichern und betriebliche Prozesse durch ein besseres Informationsmanagement und technologievermittelte physische Interaktion verbessern. Die Mission von Wideverse ist es, alltägliche Aktivitäten durch VR/AR/MR und KI-Technologien interessanter zu gestalten. Um dieses Ziel zu erreichen, entwickelt Wideverse Produkte und Softwarelösungen, die auch auf IoT und tragbaren Geräten basieren. Das Flaggschiffprodukt von Wideverse ist Scotty Expert, eine Mixed-Reality-Plattform, die es dem Benutzer ermöglicht, Bediener im Feld aus der Ferne zu unterstützen, operative Feldverfahren zu erstellen und zu verwalten und einen innovativen Ansatz für die Ausbildung am Arbeitsplatz zu wählen. All dies wird durch Technologien und Lösungen der künstlichen Intelligenz unterstützt. www.wideverse.com

Fincons Group announces latest partnership with Wideverse for Scotty Expert platform

ID: 654757

Fincons Group partners with Wideverse, to launch the Scotty Expert platform, connecting frontline workers with remote experts.

(firmenpresse) - Milan, 2nd February 2022 - Fincons Group, an international IT business consulting and system integration company with over 2000 employees in EMEA and in the USA, announces the latest partnership with Wideverse, the academic spin-off company of Polytechnic University of Bari specialized in delivering AV/VR, AI and Recommender Systems tech solutions and devising products for Industry 4.0, for the launch of "Scotty Expert", a platform developed thanks to a long-standing expertise in Artificial Intelligence, Augmented and Virtual Reality, [Machine Learning](#) for Recommender Systems.

Together, the companies will provide the market with a brand-new solution offering the best know-how and skills in manufacturing industry. This cooperation further bolsters Fincons' client offering with an innovative software for connecting frontline workers with remote experts, enhancing operators' on-site performances with AR technology, real-time video communications, and contextual data holograms. The software is fully compatible with all wearable and mobile devices and brings end users the best, most immersive, and innovative AR experiences responding to all industry requirements.

Scotty Expert guarantees access to remote knowledge, minimizes machine downtime and reduces transfer costs. It can be implemented in several fields of applications, starting from workforce training with 3D models and multimedia experiences enabling the worker to be fully involved in the coaching process, through to maintenance activities with the opportunity to lead long-distance operations between experts and on-site workers via shared 3D environments including even the proof of concepts based on common scenarios.

"Fincons thus confirms its commitment to innovate while delivering clients value and standing by them throughout their digital transformation journey," explains Michele Morelli, CEO of Fincons Group, "It is a great opportunity to partner with Wideverse. This is a concrete example of a fruitful collaboration with an innovative company that combines academic knowledge, solutions, and results coming from research labs."

"We see Fincons Group as a valuable partner," adds Tommaso Di Nola, CRO of Wideverse, "their deep understanding of manufacturing sector and the commitment and involvement in huge projects with tier-one companies will act as a springboard for the success of Scotty Expert in Industry 4.0, introducing sustainable processes and revolutionizing the approach to core operation activities."

About Wideverse

Wideverse is a start-up, spin-off of the Polytechnic of Bari, born in October 2016, which develops products and solutions based on Augmented Reality (AR), Virtual Reality (VR), Mixed Reality (MR), and Artificial Intelligence (AI) technologies. Developed around the notion of Metaverse, Wideverse vision is to create new tools capable of enriching our daily experience in designing and using Information and Improving operational processes through better information management and technology-mediated physical interaction. Wideverse mission is to make everyday activities more engaging through VR/AR/MR and AI technologies. To achieve this goal, Wideverse develops products and software solutions also based on IoT and wearable devices. The flagship product of Wideverse is ScottyExpert, a Mixed Reality platform that allows the user to provide remote support to operators in the field, create and manage operational field procedures, adopt an innovative approach to on-the-job training. All this, supported by artificial intelligence technologies and solutions.
