

## PRESS RELEASE

# Fincons Group announces latest partnership with Dassault Systèmes

Fincons Group and Dassault Systèmes partner for the manufacturing sector

**Milan, 1 February 2023** - Fincons Group, an established IT business consulting and system integration business with 40 years of experience on the international market and over 2,600 employees in Italy, Europe and the United States, has signed a new services partnership with Dassault Systèmes, supplier of collaborative 3D virtual environments for imagining sustainable innovations.

With consolidated experience and in-depth knowledge of business processes, Fincons Group supports companies in the manufacturing sector in all core and business critical processes, supporting them over the various stages of this journey both by leveraging advanced technologies such as the Internet of Things and Big Data, and by investing in innovation in Cloud Manufacturing and Advanced Human Machine Interfaces. In this dynamic sector, the Group has key references and collaborations.

Fincons Group and Dassault Systèmes, which share a focus on sustainable growth and the development of efficient and high-performance solutions for their customers, will offer the manufacturing sector new opportunities for digital transformation and process efficiency. The focus will be on modelling, planning and optimizing business activities using the DELMIA Quintiq solution, developed for complex networks and the management of critical activities in logistics and for the scheduling of a voluminous and geographically distributed workforce. DELMIA Quintiq is part of Dassault Systèmes' 3DEXPERIENCE platform, the virtual experience platform that enables companies to collectively access and apply knowledge at unprecedented speed, experiencing endless possibilities for innovation. The platform integrates 3D modelling, social collaboration, simulation, information intelligence technologies and services. These digital capabilities, transformed into "industry solutions experiences", are customized according to the complex business processes of each specific company.

The partnership has international scope and will focus on markets covered by both companies. Thanks to the partnership with Dassault Systèmes, Fincons will also be able to enrich its offering for the manufacturing sector with new solutions dedicated to MES (Manufacturing Execution Systems) and planning.

Partnerships have always been a key element of our way of doing business, thanks them we can provide customers with a complete and innovative offer and the most effective tailored solutions. Partnerships have also played a fundamental role in our global growth, reinforcing our strategy of expansion abroad which us in recent years has led to us opening new offices in the USA and Europe, including the two French offices in Paris and Lyon, where we have launched an important technological hub for the research and development of innovative solutions.

Michele Moretti  
CEO of Fincons Group
